PROFESSIONAL SUMMARY

Backend Developer with **2 years and 4 months of experience** at Rosario Software, designing and building RESTful APIs and web applications for clients in the logistics, banking and retail sectors (Correo Argentino, Banco de Formosa, Claymore-Lowlands). Specialized in **Python** and **TypeScript with Nest.js**, with training in **Java, Spring Boot and MuleSoft**. Experienced in data and AI solutions: machine learning, OpenAI API integration, customer segmentation and sales forecasting. I work in Agile teams using Scrum and apply unit testing (Jest and Pytest) continuously to every feature I build. I use AI-assisted development tools (Claude, Codex and Cursor) in both work and personal projects. Information Systems Engineering student (UTN).

WORK EXPERIENCE

Backend Developer (Python / TypeScript)

06/2024 – Present

Rosario Software — Rosario, Argentina · 2 years 4 months

- Member of an Agile development team for the past year, working within the Scrum framework: sprint planning, daily stand-ups, sprint reviews and retrospectives.
- Unit testing built into the development cycle: every new feature or component ships with its corresponding unit tests (Jest for Nest.js and Pytest for Python), ensuring code quality and maintainability.
- Version control with Git and GitHub in a collaborative workflow.
- AI-assisted development with Claude, Codex and Cursor to boost productivity in debugging, code fixes, unit test generation and documentation, always reviewing and validating the generated code.

Pucará | Correo Argentino — 11/2025 – Present

- Backend development of a web application for managing international parcel shipments.
- Implementation of RESTful APIs with a modular architecture using Nest.js and TypeScript.

  Tech stack: TypeScript, Nest.js, Jest

Gen IA | Rosario Software internal product — 01/2025 – 11/2025

- Development of a machine learning platform that analyzes different types of datasets.
- Integration with the OpenAI API to answer natural language queries for each use case.

  Tech stack: Python, Streamlit, OpenAI API

DataMate | Retail industry — 01/2025 – 11/2025

- Development of a machine learning system for customer segmentation and personalized product recommendations.
- Implementation of models to forecast future sales trends.

  Tech stack: Python, Machine Learning

RosLow | Claymore-Lowlands — 11/2024 – 11/2025

- Development of a data management, storage and analytics system to generate business insights.
- Integration with Smartsheet and charting/visualization tools.

  Tech stack: Python, Smartsheet

MovilCash | Banco de Formosa — 06/2024 – 11/2024

- Development of a digital wallet designed to simplify and streamline the management of banking transactions.

  Tech stack: Python

PERSONAL PROJECTS

Orion | Order and customer management — 01/2026

- Full stack web application for order management and customer service, adaptable to any product or service business.
- Customer management, monthly sales summaries and statistics generation.

  Tech stack: React, Nest.js, TypeScript

Bouncer The Game | Platformer video game 01/2024 – 06/2024

- Development of a platformer video game as part of the Video Game Development program.
  Tech stack: GDScript

Rick and Morty App | Informatorio 07/2023 – 12/2023

- Web application that consumes a public REST API and displays its data.
  Tech stack: React, JavaScript

Botellas de Amor | Botellas de Amor NGO 03/2023 – 07/2023

- Blog-style platform to manage the activities of an NGO dedicated to plastic bottle recycling.
  Tech stack: Python, HTML, CSS

TECHNICAL SKILLS

- **Languages:** Python, TypeScript, JavaScript, Java, C#, SQL, GDScript
- **Backend:** Nest.js, Spring Boot, RESTful APIs, Backend for Frontend (BFF), Hibernate, JPA, Apache Camel, Retrofit
- **Integration:** MuleSoft, Anypoint Studio, Design Center, APIkit, DataWeave, MUnit
- **Frontend:** React.js, Streamlit, HTML, CSS
- **Databases:** PostgreSQL, SQL Server, H2, Flyway
- **Data & AI:** Machine Learning, OpenAI API, customer segmentation, sales forecasting
- **Methodologies:** Scrum, Agile, iterative and incremental development
- **Testing & Quality:** Unit testing, Jest, Pytest, MUnit, testing integrated into the development cycle
- **AI-assisted development:** Claude, Codex, Cursor
- **Tools:** Git, GitHub, Docker, Gradle, Swagger, OpenAPI (OAS 3.0), YAML, JSON, JWT, Auth0

EDUCATION

Information Systems Engineering In progress

UTN — National Technological University (Universidad Tecnológica Nacional), Chaco, Argentina

TRAINING & COURSES

Spring Boot Training — Rosario Software 01/2025 – 11/2025

- "International Bank" project (fictional): Java, OOP, Gradle, RESTful APIs, BFF, Hibernate, JPA, Apache Camel, Flyway, Swagger, OpenAPI, H2 and Auth0.

MuleSoft Training — Rosario Software 01/2025 – 11/2025

- API design with OAS 3.0 in Design Center and flow generation with APIkit in Anypoint Studio.
- JSON transformations with DataWeave, reusable flows and sub-flows, HTTP 400/404/500 error handling, JWT and testing with MUnit.

Informatorio — Stages 1, 2 and 3 completed 03/2023 – 12/2023

Video Game Development — Stage 1 completed (GDScript and Unity) 01/2024 – 06/2024

Udemy — Nest.js and React.js (in progress) 11/2025 – Present
